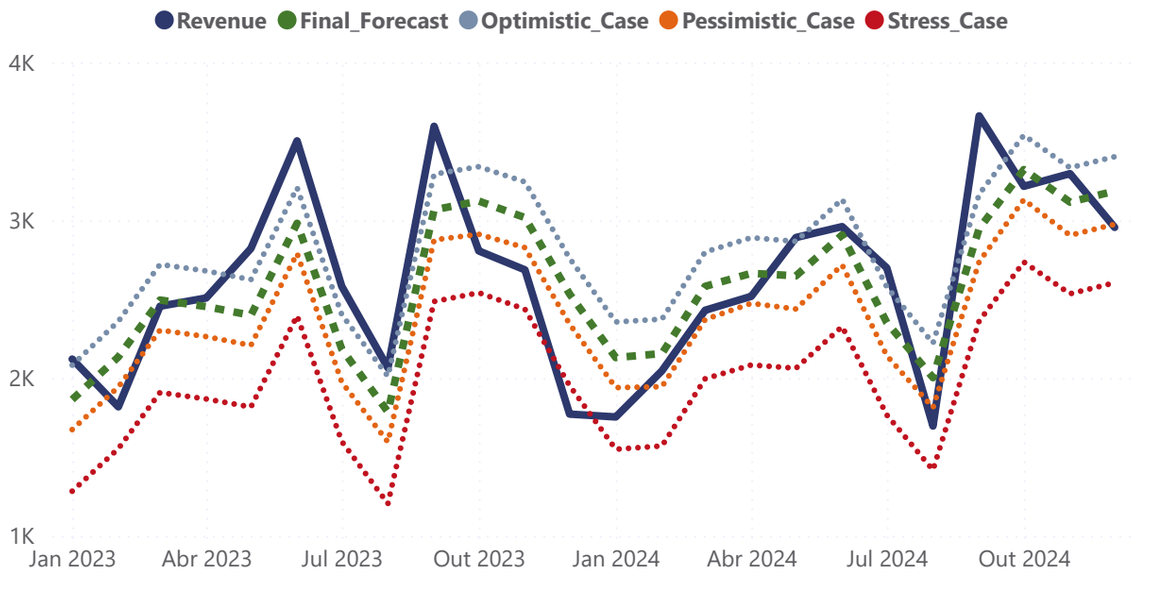
Forecasting - 2023-2024

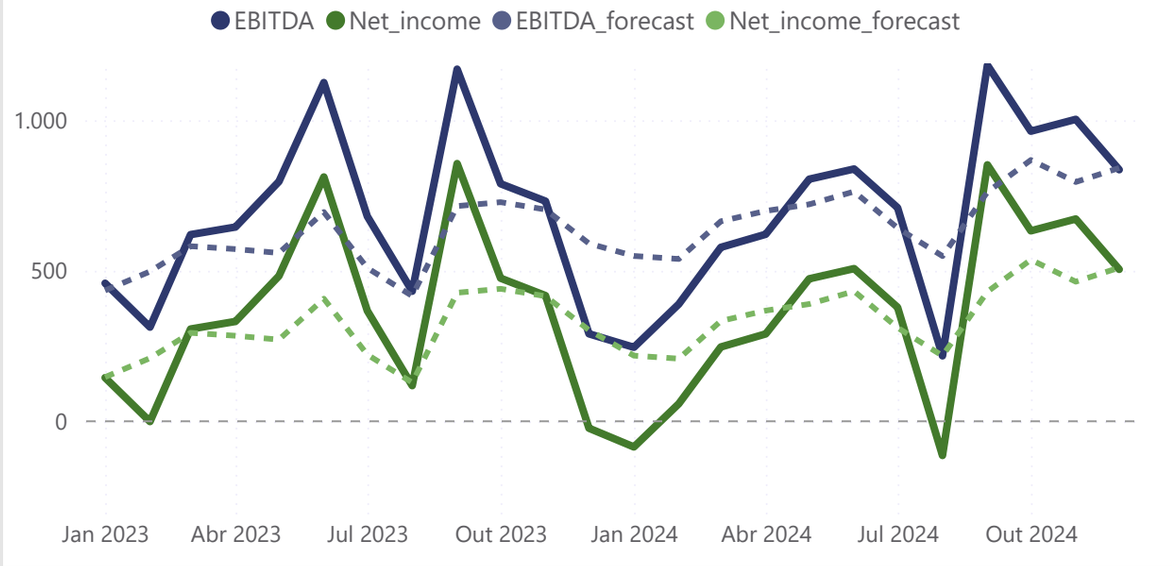
2023 - 2024 | 2023 - Monthly | 2024 - Monthly

Revenue Forecasting & Scenario Analysis



62,84M Actual Revenue	16,43M Actual EBITDA	8,70M Actual Net_Income
62,05M Forecast Revenue	15,39M Forecast EBITDA	7,96M Forecast Net_Income
-1,26% Revenue Variance	-6,36% EBITDA Variance	-8,48% Net_Income Variance

Profitability: Actual vs Forecast



Executive Highlights

| **SARIMA model (1,1,1)(1,1,1,12)** captures structural trend and seasonality in the revenue series, providing a statistically driven projection baseline. The forecast represents a purely statistical projection.

| **2023:** Statistical projection slightly overestimated performance, with **Revenue -2.3%, EBITDA -13% and Net Income -17% vs forecast**, reflecting demand volatility and temporary margin pressure from higher operating expenses.

| **2024:** Forecast accuracy improved significantly, with **Revenue almost fully aligned with projections (-0.28%) and profitability metrics in line with plan**, indicating operational stabilization and improved predictive reliability for FP&A planning.
